Now...a filing system for floppies that really works

Fan File*

Floppy Disks are fragile. Eichner Diskette Housing will completely protect each floppy in its own pocket; so your floppy will stay perfectly flat and pressure-free. The unique crimping design of the file provides "cushioning" for the diskette when the file is either open or closed. The Eichner Fan File puts up to 20 diskettes right at your fingertips.

Diskette Desk Stand*

Space saving, easy to expand design and high functionality for instant reference. This unit answers the need for a large capacity modular desk top storage system. You can also use it as a wall bracket and turn wasted wall space into an active reference station for your floppies. The capacity of one stand is 20 diskettes. Additional stands may be combined to enable your filing capacity to grow when your needs do.

Rotary Stand 200

You have never seen anything like the Eichner Diskette Rotary Stand. It holds up to 200 Diskettes in two tiers of side access pockets. Each individual tier smoothly rotates on steel ball bearings.

Eichner diskette filing pockets* come with an insertable indexing system, which gives you immediate identification of the contents of your floppies.

* US-Patent

Our solution for your modern filing problems

Diskette Folders

Your floppies are held in hanging folders, the top edge of which provides for the insertion of a preprinted date scale with identification label on its left side. Over this scale you can position colored signal flags and action slides.

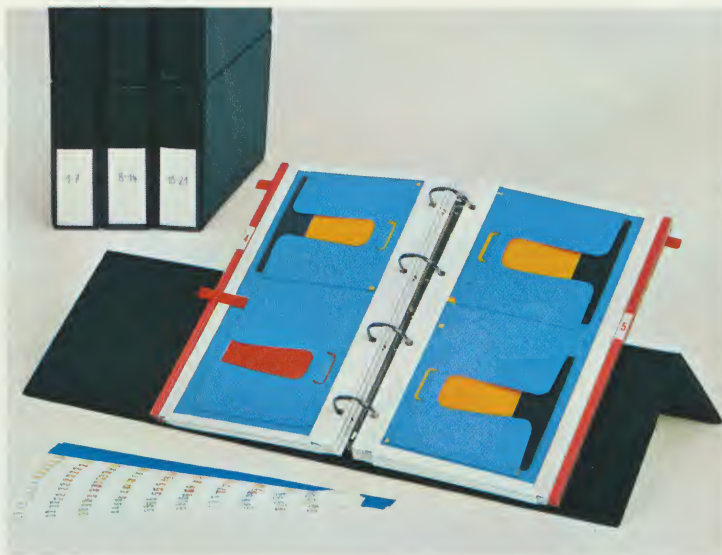

All folders are manufactured of a durable transparent plastic.

Its characteristics are as follows:

- excellent top edge visibility
- exchangeable identification labels
- removal or replacement by simple one hand operation.

The suspension basket has a capacity of 80 folders and may be placed on a desk top, stored in a standard letter-sized file drawer or kept in a fireproof file.

... including minidiskettes

Minidiskette Binder

This binder is designed for easy portability and fast access to your minidiskettes.

The binder holds up to five Minidiskette Panels** equipped with four Minidiskette Pockets** each.

Eichner Minidiskette Panels** come with an insertable indexing system, which gives you immediate identification of the contents of your minis.

The Eichner Minidiskette Binder puts up to 20 minis perfectly protected right at your fingertips.

Minidiskette Desk Stand

The Eichner Desk Stand answers the need for a large capacity modular desk top storage. Where there is no desk or center top available, use it as a wall bracket and turn that wasted wall space into an active reference station.

The Eichner Desk Stand offers a filing capacity of up to 40 minis, 4 minis per Minidiskette Panel.**

Minidiskette Rotary Stand

Whenever you need fast and easy access to a large minidiskette data base, use the Eichner Minidiskette Rotary Stand. The stand smoothly rotates on steel ball bearings. It offers a filing capacity up to 400 minis and requires a minimum of space.

There are two different sized models, one with a capacity up to 50 panels (200 minis) and a larger unit with a 100 panel (400 minis) capacity.

** US-Patent applied for.

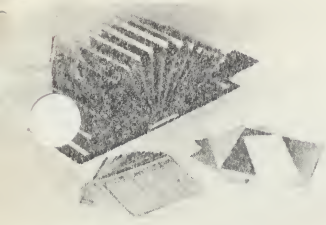

Diskette Retention and Retrieval System

Price List 1014

Diskette Retention & Retrieval System

Product Information Manual

Introduction to Eichner Diskette Filing System

Mr. Customer, the development of the mini and micro computers has introduced a new name into the modern office (FLOPPY DISK). While this product is an excellent media, the diskette itself has one inherent problem. It is very fragile; it can't be bent, folded, creased, or wrinkled. Since these diskettes can contain large amounts of information (3000 tab cards or 35 magnetic cards), users have two considerations when selecting a filing system, namely protection as well as fast access and retrieval.

For these reasons Eichner Systems has developed their diskette filing line. This new system enables you the user to establish an efficient, yet well protected filing system for this fragile media.

Features

1) FLOPPY DISK FAN FILE

- a) Crimped cushion pockets
- b) Floating axle
- c) Snap lock — vinyl cover
- d) Color coded index strips
- e) Index on the back of binder
- f) Binder style
- g) Manufactured in two sizes

Benefits

Each pocket cushions the diskette, prevents wrinkles or bends in the diskette.
Eliminates any additional stress if the binder is dropped or closed.
Keeps all the diskettes in place until you open the binder.
Enables you to color code the diskettes for easy and fast retrieval.
Gives you a list of all disks held in the binder.
Gives you a portable yet well organized file that may be moved from place to place or stored in a file drawer or safe when not in use.
A size to fit all needs, 10-20 diskettes depending upon model.

2) FLOPPY DISK DESK STAND

- a) Complete unit
- b) Handles provided
- c) Flexible design
- d) Modular-expandable
- e) Side access pockets
- f) Insertable colored index strips included

Stand comes with 20 diskette pockets and color coded indexes and axles.
You can close the unit when not in use. Saves disk space.
Can be used on a desk top or use it as a wall unit (attachments included).
Additional stands may be combined to increase filing capacity (attachments included).
Excellent access to the diskette itself. Each disk has its own unique shock resistant pocket.
It enables the user to color code each disk. The indexes come in strips of 10 that can be inserted in a typewriter.

3) FLOPPY DISK ROTARY STAND

- a) Two levels or one level construction
- b) Modular unit
- c) Holds Eichner cushioned pockets
- d) Index strips provided

Large capacity storage from 50-200 disks depending upon model. Easy access to each disk, because of side access pockets. Each level rotates on its own. excellent for two or more people per work station.
Enables the user to start with 25 pockets and expand up to 200 when his needs develop.
Give the user large capacity storage and retrieval but at the same time provides protection as well as fast access to his diskettes.
To enable user to color code the disk, making retrieval much easier.

4) DISKETTE FOLDERS

a) Transparent vinyl folders 11 x 8½" size

Durable—enables you to file your floppy completely pressure free, also enables the user to keep any documentation with the respective diskette.

Can be kept in Eichner baskets or filed in letter size Pendaflex frames.

May be locked in file cabinet or may be kept on a desk top or fireproof file.

b) Insertable date scale and indexes
Color coded signal flags

Gives the customer quick identification to contents of the folder and when used with color signal flags. Enables the user to set his complete update program.

c) Modular or expandable

With this system the user can start with as small a quantity as one disk and grow as large as needed.

d) Dividers available

Enables the user to divide the folders in each basket depending upon his needs.

Minidiskette Retention & Retrieval System

Product Information Manual

Introduction to Eichner Minidiskette Filing System

Mr. Customer, Eichner Systems has introduced a complete and well designed filing system for the newest form of magnetic media, namely mini-diskette. These new products which are becoming more and more evident with new hardware and software systems, perform much the same as the larger 8 inch diskette. Therefore, the users have the same considerations for selecting a filing system to minidiskettes, protection as well as fast access and easy retrieval.

The Eichner Minidiskette System enables the user to create an efficient yet well protected file to accommodate this new fragile media.

Features

1) MINIDISKETTE PANELS

- a) Crimped cushion pockets
- b) Color coded indexes available

Benefits

Each panel has four pockets. Each pocket cushions the mini, prevents wrinkles or bends in the minidiskette.

Enables you to color code the mini's for easy retrieval and fast identification.

2) EASEL BINDER

- a) Index on spine
- b) Opens into easel
- c) 1½ inch capacity
- d) Easel mechanism folds from top

Gives you a list of all mini's contained in the binder.

Gives you a portable yet well organized file — that provides easy access to the diskettes and can be stored in a file drawer or safe when not in use.

Holds from one to 5 panels or up to 20 minidiskettes per binder.

Provides better support for panels than a bottom fold — panels cannot damage desk.

3) DESK STAND

- a) Flexible design
- b) Modular-expandable
- c) Handles provided

Can be used as a desk top or wall mounted unit (attachment included).

Additional stands may be combined to increase filing capacity (attachments and instructions included).

You can close the unit when not in use. Saves desk space.

4) ROTARY STAND

- a) Modular construction
- b) Rotates on ball bearings
- c) Prepacked with axles

Holds from 25-100 panels or up to 400 minidiskettes depending upon model.

May be used by more than one person at a time. Easy to locate minidiskettes within a large data base using color code indexes and outguides.

No need to order additional axles when expanding data base.

5) MINIDISKETTE MAILER

- a) Heavy duty construction
- b) Label holder on front cover
- c) Multi-usage
- d) Velcro closure
- e) Reusable (vinyl cover)

Provides solid protection for up to 5 minidiskettes.

Provides index space for address information.

Can be used for mailing — inter department transport or small capacity filing.

No pressure exerted on the minidiskette when closing the file.

Holds up better than cardboard under heavy usage.

6) OUTGUIDES

- a) Outguides are available for use with all systems.

These enable the user to replace the minidiskette in its proper position within the file, preventing misfiled or lost media.
